

ICARUS **Omega**

MAKING IT EASY

The Icarus Omega is a 7-Cell, Lightly elliptical, Zero Porosity, RW canopy. It has been designed as an all round no hassles, RW, Demo Jumping, Fun Accuracy, Fun CRW canopy. It is super easy to use with delicious "7-cell" openings, easy packing and gentle landings. At lighter wing loadings it is a good student transition or first canopy or for someone who just wants to take it easy. At heavier wing loadings it will get zippy and fun while maintaining cruzy openings and reasonable landings.

Custom sizes available at no extra cost.

Recommended Wing Loading: 0.75 to 1.4 PSF

Canopy-Model	Size	MSW	Weight
