

# **ICARUS** **Tandem**

## **THE PROFESSIONAL CHOICE**

Many professionals have trusted the ICARUS Tandem as their best professional tool due in part to:

- Smooth openings
- Low pressure toggle input
- Industrial grade
- Proven durability

The Icarus Elliptical Tandem canopy is a totally Zero-P, Truly Elliptical canopy (leading edge and trailing edge) The only straight cell is the centre cell.

It remains very cost effective by lasting 2000 plus jumps.

This ICARUS Tandem canopy offers very comfortable openings, easy landings and light toggle pressure.

The ICARUS Tandem is definitely the **CHOICE OF PROFESSIONALS**. It is available in 3 standard control line configurations providing performance and ease of use and comes with either, Vectran (standard), Spectra or Dacron fully cascaded lines. Standard sizes are 330, 365 and 400sq/ft. The 365 with Vectran lines and 6 & 2 control line set up has become the standard and is often available off the shelf.

Canopy-Model	Size	MSW	Weight
Tandem - 330	330 Sq.Ft.	439 Lbs	13 Lbs
