

1. Canopies with dacron suspension lines or custom artwork will have a higher pack volume.
  2. Only F-111 main pilot chutes are recommended for use in Sun Path harness and container systems.
  3. Generally the next smaller size main canopy can be safely installed and jumped in any given main container although Sun Path has not tested every application of this.
  4. **Do not install a main or reserve canopy larger than the sizing chart calls for as there are serious safety issues that may arise from “overstuffing” a main or reserve container.**
  5. When in doubt contact Sun Path directly with canopy/container compatibility questions.
- 2.

Container Model	F-111 Reserve Canopy	Low Bulk Reserve Canopy	Zero Porosity Main Canopy	Hybrid F-111/ ZP Main Canopy	Low Bulk Main Canopy	Crossbrace Main Canopy	Main Pilot Chute Diameter (F-111)
