

Canopy Compatibility Chart

The Aurora is made in six possible sizes (2A, 2B, 2C, 3A, 3B, 3C). The number indicates the reserve tray size, while the letter indicates the main tray size.

Start by selecting your reserve from the gold column. Then, select your main from the columns directly to the right of your reserve. If you can't find your combination in one of our sizes, or if you don't see your canopies listed here, please give us a call.
