

Accuracy Javelin Hard Toggle Instructions

Step 1

Route Control Line from side of plastic toggle.

Step 2

Secure with a double Overhand knot followed by a single knot.

Step 3

Sun Path Recommends setting the steering lines to the top of the base ring or grommet.

Step 4

Secure with chain link.

Accuracy Javelin Hard Toggle Instructions.

Step 5

Step 6

Step 7

Step 8

Add a second chain link.

Lightly cinch chain link.

Secure Toggle in either elastic or bungee keeper.

The Accuracy Javelin risers are designed to give the Accuracy Jumper several options.

1. Steering line routed through the guide ring on the third risers with the hard toggle secured with elastic bungee on third riser.
2. Steering lines routed through bottom guide ring and hard toggle secured with elastic keeper.
3. Steering line routed through both guide rings and hard toggle secured with elastic keeper.
