

LEGEND M

Training and improvement parachute

The military Legend M has been designed for providing all jump configurations to follow the parachutist from his initial training to operational missions.

Concentrate of technologies and expertise

Based on the experience of the Atom family integrating the latest standards of safety and comfort, the Legend M is the most perfect and reliable training equipment on the market.

Equipped with Phantom 260 main canopy, the Legend M/HG is the most advanced equipment to train skydivers for air insertion missions.

Five opening systems possibilities

To provide an adaptability for all types of training and improvement configuration systems, the Legend M will provide you different opening system possibilities:

- Static line with direct bag development or with pilot chute assistance
- Chest located conventional metal ripcord
- Hip mounted plastic ripcord
- BOC plastic ripcord
- BOC hand deployed pilot chute

TECHNICAL CHARACTERISTICS

RESERVE CANOPIES

	Techno 190	Techno 240
SURFACE	190 sq.ft	240 sq.ft
NUMBER OF CELLS	7	7
ASPECT RATIO	2.2	2.2
MAX. PAYLOAD	110 kg	130 kg
MAX. DEPLOYMENT VELOCITY	150 kt	175 kt
MAX. DEPLOYMENT ALTITUDE	12,000 ft	12,000 ft
RESISTANCE TEST	135 kg / 180 kts	155 kg / 180 kts

MAIN CANOPIES

	PRIMA 260	PRIMA 290	Phantom 260
SURFACE	260 sq.ft	290 sq.ft	260 sq.ft
NUMBER OF CELLS	9	9	11
FABRIC	Hybrid	Hybrid	Hybrid
MAX.PAYLOAD	100 kg	130 kg	130 kg
GLIDE RATIO	2,7	2,7	4,5
VOLUME (Cubic inch)	575	629	550
